

THE COMFORT YOU DESERVE

The EcoNet[®] Enabled Rheem[®] *Classic Plus[®]* Series Two-Stage Air Conditioner offers the solid technology and energy-saving performance you've come to expect from Rheem. It's the quiet indoor comfort your family deserves.

RA17 Classic Plus Series Cooling Efficiencies up to 17 SEER / 13 EER

Quiet & Efficient

Our new air conditioners are designed to perform both efficiently and quietly, delivering home comfort you can count on when you need it most.

Increased Comfort

The Two-Stage Copeland Scroll[™] UltraTech[™] compressor provides more precise temperature control and humidity levels for increased comfort.

Smart Controls & Alerts

Innovative technology sends you important alerts and reminders to keep your system working at its best. Plus, it's easy to adjust your comfort settings from home or away².

Our Philosophy of Innovation

We meticulously evaluated every detail of this product from every angle, considering the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your air conditioner to bring you and your family years of comfort.

The Rheem® RA17 *Classic Plus®* Series Air Conditioner is designed to operate with the EcoNet® Smart Thermostat. This easy-to-use thermostat optimizes system performance and includes great features like:

- Simple scheduling and one-touch energy savings
- Remote access via the EcoNet App
- Important equipment alerts sent directly to your phone or email
- Convenient voice control just ask "Alexa, make home cooler"³

Dependable & Legendary Performance

The **①** Two-Stage Copeland Scroll[™] UltraTech[™] compressor makes the *Classic Plus* Series as efficient as it is durable. A Single-Stage unit runs at one speed, but the Two-Stage RA17 modulates between two speeds-high and medium. It will operate on medium speed most of the time, providing more precise temperatures and lower humidity while also reducing energy use. The system only operates on high when necessary during peak, warm weather conditions. The compressor also has 70% fewer moving partswhich means you get a unit that's more efficient and more reliable. The **②** optimized fan orifice contributes to quieter operation, optimal airflow and better overall performance. Simply put, you get efficient comfort that lasts a very long time.

A Quieter & More Durable Unit

It starts with our smart new ③ composite base pan. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure that the base pan stays looking new for years to come. Our improved refrigerant tubing design also contributes to a quieter, more reliable operation. For added strength, ④ curved louver panels and ⑤ rugged corner posts on the exterior do an excellent job of protecting the inside.
